| **, | Any re | eplaceme | ent sheet containing such amendments must be referred to under item 1 and annexed to this report. |

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No. PCT/EP 03/04030

I. Basis of the report

1. This report has been drawn on the basis of (Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to the report since they do not contain amendments.):

The amendments submitted with the letter of 19 March 2004 introduce substantive matter which, contrary to PCT Article 34(2)(b), goes beyond the disclosure in the international application as filed.

The passage on page 9, line 30, cannot be a basis for the following amendment in claim 1:

- that (the final matrix) is pasty.

This amendment therefore will not be taken into account during further examination proceedings.

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

| | Claims | 1-13 | NO NO |
| Industrial applicability (IA) | Claims | 1-13 | YES |
| | Claims | | NO |

2. Citations and explanations

1. Cited documents

This report makes reference to the following documents:

D1: WO-A-0184961 D2: WO-A-9321190 D3: WO-A-9211294

2. Desirable result (PCT Article 6)

Claim 1 does not meet the requirements of PCT Article 6 because the subject matter for which protection is sought is not clearly defined. The claim attempts to define the subject matter in terms of the result to be achieved, namely:

- and the additional matrix components being selected in such a way that the final matrix is solid at room temperatures and has the property of shear thinning;

but in so doing merely states the problem to be solved, without specifying the technical features necessary for achieving this result.

Such wording is not admissible in the present case because it seems possible to describe the subject matter of the application more concretely, i.e. to specify the matrix components.

This amendment therefore will not be taken into account of during further examination proceedings.

Novelty (PCT Article 33(2))

When assessing the novelty of the subject matter of a claim, statements regarding an intended, special type of use (for example, "as a bioactive component", claim 1) are not to be taken into account.

D1 (see page 13, example 1 and claims 1 to 18) discloses a capsule for use in the treatment of dementia, containing: a/ 15.6% w/w phosphatidylcholine (PC), b/ 14.5% w/w phosphatidylserine (PS), c/ 15.1% w/w omega-3 fatty acid and d/ 24.1% w/w vitamin E. The subject matter of claims 1 to 13 is therefore not novel (PCT Article 33(2)).

D2 (see pages 37 and 38, example 7) discloses a capsule for treating symptoms of pathologies of the central nervous system, said capsule containing PC and PS and having an outer shell containing gelatin and glycerol. The subject matter of claims 1, 3, 4 and 11 to 13 is therefore not regarded as novel (PCT Article 33(2)).

D3 (see example 2.1 on page 36) relates to a tablet or a capsule containing: a/ 17% w/w new heparin derivative PE, b/ 45.5% w/w PC + PS, c/ 28.4% w/w lactose and d/ 5.7% w/w microcrystalline cellulose. The subject matter of claims 1 to 12 is therefore not novel (PCT Article 33(2)).

4. Inventive step (PCT Article 33(3))

Since the subject matter of claims 1 to 13 is not novel, it also does not involve an inventive step (PCT Article 33(3)).

International application No. PCT/EP 03/04030

5. Industrial applicability (PCT Article 33(4))

The subject matter of claims 1 to 13 meets the requirements of PCT Article 33(4) with regard to industrial applicability.
